System Description: The *EECO 1500* functions in the same manner as the *EECO 2000* but does not monitor product lines electronically. The *EECO 1500* system is able to monitor product lines by the use of interstitial sensors. Monitoring sensors can also be used for dispenser pans, sumps and liquid/vapor wells. The *EECO 1500* management system is designed to monitor two and four tank systems. Tank leak tests will start automatically after deliveries or can be programmed to start at a selected time daily, weekly or monthly. A segmented leak detection (SLD) **option** is available to provide continuous tank leak detection; however, it is **not** 3rd party certified.

Refer to the EECO 2000 information sheets for additional system description and instructions to obtain reports.
